Summary

Passionate and results-driven Flutter Developer with over 2 years of hands-on experience in building cross-platform mobile applications. Expert in Dart and the Flutter framework, with a strong focus on Clean Architecture, State Management (Bloc/Cubit), integrating RESTful APIs, Firebase, and Hive for local caching, and high-performance UI development. Proven ability to deliver high-performance, scalable apps from concept to deployment.

Skills

- OOP principles
- State Management (e.g., Bloc, provider)
- RESTful Api Integration
- Dependency Injection (GetIt)
- Firebase and Hive
- Git - GitHub
- Localization
- Responsive and Adaptive UI/UX Design
- Unit Testing
- Code Generation (build_runner)
- Clean Architecture
- Payment Integration (e.g., PayPal, Stripe)
- Published apps on Google Play

Education & Certificates

- Bachelor of Computers and Informatics, Zagazig University in Sharqia (2019-2023).
  Grade: Very Good. **(Certificate)**
- Flutter Advanced Course Bloc and MVVM Pattern
- Flutter & Dart Complete Development Course -Udemy
- The Complete Flutter Development Guide
- Responsive and Adaptive UI/UX Design

Projects

- **Akla (Food App) (GitHub)**
  - Includes almost all the restaurants depending on the places around.
  - Allow for the users to order food and additions and give the option to use the delivery or take the order from the restaurant.
  - In case delivery, the user can track the order.
  - Delivery release for the delivery man to accept the delivery order and send the tracking location.
  - Restaurants release for the restaurant to receive the orders and the upload the menu and the offers.
- **Mass Market (E-commerce App) (GitHub)**
  - Developed a full-featured e-commerce mobile application using Flutter and Dart.
  - Offering users a smooth and intuitive shopping experience.
  - The app included features such as product browsing, advanced search and filtering, shopping cart, wishlist, secure checkout, and order tracking.
  - Integrated with a secure payment gateway and connected to a custom backend via RESTful APIs.
